B3D settings:

- Name: B3D

Move near corners to snap

Tips

- Double click item to move it.
- Single click item to show options.
- Right click item to edit it.

3D view

3D View

- Left Click and Drag to rotate the scene.
- Right Click and Drag to pan the scene.
- Scroll Forward and Backward to zoom in and out.

Settings

Settings

- Snap Distance: 2
- Dark Theme:
- Remember Last Item Settings:

Reset to default values

Snap Distance is the distance between two items before they snap together. Hold shift while moving an item to stop snapping.

Dark Theme might be easier on the eyes.

Remember Last Item Settings make the next item of the same kind have the same values as the last. You can reset the item with the reset button.
